

MEASURE ALIGNED QUALITY WORKGROUPS

We invite our contracted providers to participate in any of our four KPI-aligned workgroups. These one-hour sessions meet every other month and offer a collaborative space to work alongside NHP team members to support improved clinical outcomes.

These workgroups support network goals and provide a space to exchange best practices with other healthcare professionals. What's learned through these discussions informs the larger QM group and helps drive regional performance.

If you'd like to request an invitation to join, please reach out to Provider Relations at the email address below and let us know which group or groups you're interested in.

NHPproviders@nhpllc.org

Building a stronger healthcare network through collaboration.

Contact us today to get involved in our quality initiatives!
