

In Colorado, Medicaid is called Health First Colorado. Every Health First Colorado member belongs to a regional organization that manages their physical and behavioral health care. NHP is a regional organization and supports a network of providers to make sure members can access care in a coordinated way.

We now have two Program Improvement Advisory Committee (PIAC) meetings, one focused on Urban communities and one on Rural communities. These groups are for members, family members, providers, county employees, and other stakeholders. If you're unsure which group to join, feel free to reach out and we'll be happy to assist you. You're also welcome to participate in both! The purposes of these committees are:

- To improve the health of Members in our region
- Find out if Members are happy with their health plan
- Make sure Members can access their services
- Encourage community engagement
- Develop programs to improve health outcomes
- Discuss the quality of care and service
- Learn about how we are performing by looking at Key Performance Indicators (KPIs) and Behavioral Health Measures

Come Join us for our Next Meeting!
